Dear Steve:

Public/Private Partnerships have been such an important component to our **Protect With Respect** initiative and DSW Homes has been at the forefront of this community outreach program. You have been a very public supporter of this department and our efforts, and Chief Henry Porretto joins me in expressing appreciation to you not only for your leadership in this direction but also for the pro-active response to requests for support. Your donation and heartfelt interest in encouraging and maintaining a positive outlook for youth will make our TAPS course possible. You can be assured that we are reaching out to at-risk young people in the area one at a time, one TAPS session at a time. Every single life changed will profit from your investment.

Thank you for believing that each personal contact will reap a benefit; and thank you, personally and professionally, for your generosity and for the valued friendship we have formed.

Sincerely,
