## Chambers County Round 1.2—June 2013-Present

Another program established to help citizens in the great state of Texas recover from the damage caused by Hurricane Ike in September of 2008, the Chambers County Disaster Recovery Housing Program began in 2011.

Due to DSW Homes' success in the Chambers County Disaster Recovery Round 1.1, we were awarded over 9 million dollars to participate in Round 1.2, with the ability to reconstruct or rehabilitate 75 homes. As part of Round 1.2, DSW Homes is pairing up with the Houston-Galveston Area Council to help Chambers County residents apply and become qualified to participate in the program, acting as both the prime contractor and the building contractor. In this round, DSW Homes has already completed the reconstruction of 16 homes, with 11 more under construction or soon to be under construction.

Home completed in July 2013 with a build out time of 31 days!
