Chambers County Round 2—starting in January 2014

Another program established to help citizens in the great state of Texas recover from the damage caused by Hurricane Ike in September of 2008, the Chambers County Disaster Recovery Housing Program began in 2011.

As part of Round 2, DSW Homes was awarded a contract amount of over 17 million dollars to help reconstruct or rehabilitate up to 162 homes in Chambers County, partnering with the Houston-Galveston Area Council. Similar to Round 1.2, DSW Homes will act as both the prime contractor and the building contractor to help Chambers County residents apply and become qualified to participate in the program and then participating in the construction activities needed. It is anticipated that round 2 will begin in January 2014 and coincide with the remainder of Round 1.2.
