Galveston County Housing Assistance Program Round 1: Rentals--February 2011-June 2013

Round 1 of the Galveston County Housing Assistance Program (GCHAC) was a 17 month program that involved Hurricane Ike recovery in the County of Galveston, in Texas. The GCHAC program included both the reconstruction and rehabilitation of homes damaged by winds or flood waters.

As part of Round 1, DSW Homes participated in reconstructing and rehabilitating rental properties. We completed approximately 40 of these projects. Restoring rental properties, in addition to owner-occupied residences, helps the housing market in the County as well as allows for continued economic growth in the community. DSW Homes worked with owners of these properties as well as tenants to ensure the construction posed as little disruption to their living arrangements as possible.
