## Galveston County Severe Repetitive Loss Program (SRL)--October 2013-Present

This program, funded by the FEMA Severe Repetitive Loss (SRL) Elevation Grant Program, seeks to elevate homes to help eliminate or reduce future flood claims on certain residential properties within flood prone areas of Galveston County.

DSW Homes has taken part in other elevation projects within other programs in parts of Galveston County and as a result of that experience along with other qualifications, we were admitted to the SRL program last fall. Construction activities commenced in March 2014 and we anticipate elevating approximately 50 units throughout the course of this program.
