## **New Jersey Rehabilitation, Reconstruction, Elevation and Mitigation Program (RREM)—July 2013 - Present**

In October 2012, Superstorm Sandy impacted many states along the Eastern United States, including New Jersey. With flooding, wind damage, and more, thousands of homes were damaged as a result. Homeowners were without power and other essential utilities, making their residences uninhabitable.

Having participated in the New York City Rapid Repairs program from January through May 2013, we are familiar with the particular challenges faced by the northeast in recovery from Hurricane Sandy. In July 2013, DSW Homes was accepted into the New Jersey RREM program and we expect to begin construction in Spring of 2014. We are looking forward to working with the homeowners and municipalities to rebuild New Jersey.

Damage along the New Jersey coastline from Hurricane Sandy.
